SUPPLY DIVISION

25X9

1. [redacted] overseas stations and bases are authorized to requisition directly, or indirectly through a parent station, from [redacted]. To date, [redacted] stations have been notified to requisition directly and [redacted] to requisition through the authority given their parent stations. Use of these facilities is expected to expand somewhat under the "Buy American" policy.

2. Agency materiel and other assets (exclusive of real property, proprietary, and subsidy projects) were valued at approximately [redacted] as of 31 December 1960.

25X1

3. The Supply Division, in the course of the Purification of Assets Program, generated the disposal of surplus, obsolete, or unserviceable-uneconomically repairable items of property with an inventory value of \$899,546 during the first nine months of FY 1961. In addition, a Utilization and Standardization Program was initiated in November 1960. Under this program, 1260 line items have been examined resulting in the declaration of 553 as standard and 707 as nonstandard items. Nonstandard items will be published in forthcoming excess lists or removed from the stock system through forced issue.

25X9

4. As of 31 March 1961, all overseas stations and bases have implemented Type II Financial Property Accounting procedures. There are [redacted] stations and bases operating under the program and [redacted] more which are subject to the procedures but which have their accountability maintained by a parent station.

25X9

5. The specifications covering packaging and package construction of the aerial delivery packs for [redacted] program have been revised from a heavy to a lightweight type. The lightweight pack, weighing from 80 to 100 pounds, affords better "carry-away" capabilities and provides for more versatile air delivery.
